524518 SCANMASKIN 18

Scanmaskin 18 you can grind and smooth old, painted and damaged wood flooring as well as new ones, and it works equally well when grinding plank flooring as parquet floors.

Scanmaskin 18 is, thanks to its size, a very smooth machine that you can easily get close to the wall with. It is also equipped with adjustable speed so you can adjust your speed to the type of surface you will grind. Adjustable speed is often crucial when sanding wooden floors. There are a large number of tools and sandpapers in different grits that you easily can mount on the machine with velcro holders or our custom made ScanOn discs.

The ScanOn discs enables easy and quick handling when changing or assembling tools. With a simple touch the tools are fitted in custom cuts and with a light push they are in place.

For smooth and simple transport the Scanmaskin 18 is easy to separate into two parts.

524500 SCANCOMBIFLEX 450

The ScanCombiflex 450 (SC 450) is the first model in a new generation of floor grinders, which combines a small footprint with high productivity. It is a versatile grinder for both aggressive and fine grinding of concrete and natural stone surfaces and also very effective in removing impurities, like paint and carpet residues.

SC 450 is a flexible and easy to use grinding machine perfect for the rental market and smaller renovating business. Although the machine is light it still has a robust and stable construction made of steel, which makes it very durable and steady to operate. The construction with spring-steel flex heads reduces the vibrations and allows the machine to grind rough surfaces with minimal effort.

516000 SCANCOMBIFLEX 330

ScanCombiflex 330 (SC 330) is a powerful and easy to use machine. It is one of the most versatile machines on the market. The 330 mm grinding disc is effective when grinding smaller areas, removal of tough coatings and also works very nicely in preparatory work. With a simple maneuver SC 330 can also be made into an edge grinder that can be adjusted for grinding in two different directions.

The 330 mm disc on the SC 330 can be configured with 3, 6, or 9 of our metal or resin bond diamond tools. This allows the machine to cut more aggressively when necessary, or grind soft surfaces by spreading out the weight and using more tools. Sandpaper and our ScanPad Dancers can also be used with the SC 330. For smooth and simple transport the SC330 is easy to separate into two parts.

ScanCombiflex 330 is available in several performance models with different accessories.

520500 SCANCOMBIFLEX 450 NS

ScanCombiflex 450 NS (SC 450 NS) also combines the small size with big grinding power and high efficiency. The SC 450 NS comes standard with a built-in water tank for wet grinding which makes the machine suitable for grinding of terrazzo and eliminates the need for an external water source.

SC 450 NS is flexible, easy to use and suitable for both the rental market and smaller renovation business. The SC 450 NS also features variable speed, which is crucial for certain grinding and polishing applications along with coating removal.

The construction of the SC450 NS is very robust and stable and made of steel. This makes the machine very durable and stable to operate. The construction with spring-steel flex heads reduces the vibrations and allows the machine to grind rough surfaces with minimal effort.

530000 SCANCOMBIFLEX 500 i

ScanCombiflex 500 i (SC 500 i) is a highly effective and powerful machine in contrary to its compact size. The machine has a high reliability and it is easy to get started with and simple to operate and maneuver.

It is a robust and strong machine for use when grinding concrete and stone. You can also use it for renovating, removing coatings and remove impurities from the surface.

For the SC 500 i there is a large variety of grind-, polish-, scratch tools and sandpapers for different surfaces and conditions.

The SC 500 i features 100% steel construction, along with our patented flex head system for reduced vibration and smooth operation on rough surfaces. This construction gives a reliable machine with minimal maintenance.

560002 SCANCOMBIFLEX 650

The ScanCombiflex 650 (SC 650) is a robust and stable machine made of steel, designed for both residential and commercial projects with its grinding width of 650mm. The SC 650 uses a patented planetary system to drive its three heads. This patented system uses a double-sided cog belt. The components are carefully chosen to ensure a safe dependable operation and high quality

SC 650 is extremely durable and easy to maintain. The design helps to reduce the torque and stress on the operator. With the SC 650 there is also the option for wet grinding by using the simple water connection.

TECHNICAL DATA

Standard

Voltage: 3 x 400 V
 Motor power: 7,5 kW
 Current: 16 Amp.
 Frequency: 50-60 Hz

530500 SCANCOMBIFLEX 500 PD

ScanCombiflex 500 PD (SC 500 PD) comes with a built-in water tank for wet grinding. This takes away the problem with external water supply. It is an efficient and strong machine for use when grinding concrete, stone and terrazzo. You can also use it for renovating, removing coatings and remove impurities from the surface.

For the SC500 PD there is a large variety of grind-, polish-, scratch tools and sandpapers for different surfaces and conditions.

The SC 500 PD features 100% steel construction, along with our patented flex head system for reduced vibration and smooth operation on rough surfaces. This construction gives a reliable machine with minimal maintenance. As standard, the SC 500 PD is equipped with adjustable speed, this makes the machine work very well on all types of surfaces, such as concrete, stone and terrazzo.

570000 SCANCOMBIFLEX 700 RC

The ScanCombiflex 700 RC (SC 700 RC) is a robust and stable machine made of steel, designed for high productivity in both small and large areas. The 700 mm (28in) grinding footprint is perfect for commercial applications where compact size is important as the SC 700 RC is controlled by the radio control the machine handle can be folded down and then the machine works well even in smaller spaces.

SC 700 RC is equipped with our patented drive system that enables a stable and smooth grinding. SC 700 RC has three rotating grinding discs that rotate in the opposite direction relative to how the gear housing is mounted. This results in the SC 700 RC grinds and polishes the floor surface in a higher speed while minimizing lateral movements and then becomes very easy for the operator to maneuver.

The truly unique feature of the SC 700 RC is the Bluetooth radio control system it uses for controlling motion and grinding speed. The rugged, heavy-duty remote control unit allows the operator to move, with a joystick, the machine in any direction, and maneuver with precision in tight areas. You can also choose your speed and activate the "cruise control" for easier handling of vacuums and cables.

A radio-controlled machine provides a minimal load and no vibration for the operator while the grinding capacity of the number of square meters per hour increases dramatically. The built-in battery backup for the drive wheels makes it easy when loading and unloading, the battery is automatically loaded up as soon as the machine is connected to electrical main.

TECHNICAL DATA

581000 SCANCOMBIFLEX 800

The ScanCombiflex 800 (SC 800) is a robust and stable machine made of steel, designed for high productivity in large areas. The SC 800 offers 800 mm (32in) of grinding power combined with 380 kg (838 lbs.) of weight, making it the perfect machine for commercial applications where you need a high capacity grinding. SC 800 is equipped with our patented drive system, which gives the machine a stable and smooth grinding process.

The SC 800 has three grinding heads, which spin in a counter-rotating configuration for increased efficiency and smooth operation. This allows the machine to grind or polish at higher speeds, while at the same time minimizing side torque and stress on the operator. The stable balance in the machine also reduces vibrations for the operator, and enables the machine to produce consistent results with minimal effort. The SC 800 also comes with a water connection so you can use it for wet grinding as well.

583000 SCANCOMBIFLEX 1000 RC

The ScanCombiflex 1000 RC (SC 1000 RC) is the largest model in our line of grinding machines. It is a robust and very stable machine, made entirely of steel and designed for commercial applications. The 1000 mm (40in) grinding footprint is perfect for large commercial applications where high productivity is necessary

SC 1000 RC is equipped with our patented drive system that enables a stable and smooth grinding.

The truly unique feature of the SC 1000 RC is the Bluetooth radio control system it uses for controlling motion and grinding speed. The rugged, heavy-duty remote control unit allows the operator to move, with a joystick, the machine in any direction, and maneuver with precision in tight areas. You can also choose your speed and activate the "cruise control" for easier handling of vacuums and cables.

A radio-controlled machine provides a minimal load and no vibration for the operator while the grinding capacity of the number of square meters per hour increases dramatically. The built-in battery backup for the drive wheels makes it easy when loading and unloading, the battery is automatically loaded up as soon as the machine is connected to electrical main. To make your work even easier you can mount an extra front wheel to be used when you move, load and unload the machine.

561500 SCANCOMBIFLEX 650 DSP

ScanCombiflex 650 DSP is the optimal helper for each operator. The machine will guide you through the entire grinding process through the integrated computer positioned on the machine's control panel.

By the guiding system on the panel the machine operator gets, via the sensors, feedback and warnings when the tool wear is too high or is completely worn out. The sensors continuously measure the wear and thickness of the tools to guide the operator to optimal consumption. Savings of up to 25% has been demonstrated when changing to the model DSP.

ScanCombiflex 650 DSP (SC 650 DSP) is a robust and stable machine built entirely of steel, designed for commercial projects. SC 650 DSP is equipped with our patented drive system to power the three grinding heads. The drive system is constructed with high quality components like a double-sided toothed belt in combination with a ring gear. The components are carefully selected to ensure high reliability and high quality.

560500 SCANCOMBIFLEX 650 PROPANE

The ScanCombiflex 650 PROPANE (SC 650 PROPANE) is a robust and stable machine, designed to be operated 100% from propane, which makes it very flexible and with many different areas of application.

The ScanCombiflex 650 PROPANE is great for outdoor applications where there are limited power options. Of course you can also use the machine indoors, with good ventilation. With its weight and motor power the SC 650 PROPANE is a powerful and efficient machine.

The ergonomic design allows the machine to grind and polish at higher speeds, while at the same time minimize side torque and stress on the operator. It also reduces vibrations for the operator, and enables the machine to produce consistent results with minimal effort. With the 650 mm grinding width the SC650 Propane is perfect for smaller residential jobs as well as the bigger commercial jobs.

**726200 SCANDUST MINI**

ScanDust Mini is a small and efficient industrial vacuum cleaner that works for wet vacuuming as well as dry. ScanDust Mini is also equipped with the smart cleaning system Jet-Pulse that pulsates the filters to keep them clean.

ScanDust Mini is also equipped with outlets for grinding machines with an engine capacity of up to 2000 W. This makes ScanDust Mini to a versatile small industrial vacuum cleaner that works equally well with a grinding machine as for general cleaning in the workplace.

TECHNICAL DATA

Voltage: 220-240 V
 Frequency: 50-60 Hz
 Motor power: 1200 W
 Max effect: 1400 W
 Airflow by fan: 220 m³/h/MG
 Vacuum by fan: 248 hPa/MG
 Airflow by hose: 140 m³/h/MG
 Vacuum by hose: 225 hPa/MG
 Sound level: 69,5 dB
 Measure: 59x47x64 cm /
 23"x18,5"x25"
 Weight: 12,7 kg / 28 lbs.

729000 SCANDUST 2900

The dust collector Scan Dust 2900 (SD 2900) is a great option for all of our smaller grinders; Scanmaskin 18 up to SC500 PD. SD 2900 is a versatile and efficient dust collector, known for its high reliability and performance. The cylindrical design functions as a pre-separator, causing heavy particulate to separate from the fine dust. This allows the heavy particles to immediately drop into the bottom of the cyclone, bypassing the filters completely, which increasing filter life and suction performance.

The SD 2900 is equipped with the efficient Jet-Pulse system that pulses the filters in order to keep them clean. The SD 2900 uses sock filters, which can easily be washed in order to prolong filter life. There is also a main filter option; a traditional cartridge filter that could be better when e.g. working on hardwood floors. The main filter cassette can easily be changed to fit the cartridge filters. In addition the SD 2900 is equipped with two HEPA 13 filters that takes care of insanitary particles

The SD 2900 takes advantage of the Longopac bagging system, which makes managing dust very easy and efficient. With the Longopac system you will get 20m of folded plastic bag that gives you about 25 dust free changes.

For smoother transport and storage the SD2900 is equipped with gas springs that makes it easy to adjust the height of the machine to minimize its size.

**711000 SCANDUST 1300**

ScanDust 1300 is known for its good suction performance and high reliability. The cyclone separates rough material before any filter is charged. The main filter package consists of washable and durable fabric filter socks. Absolute filters take care of the small health hazardous particles, the filters are of type H13 (HEPA classification). To achieve maximum suction capacity is ScanDust 1300 equipped with filter cleaning, called Jetpuls.

To handle the sucked up material the smart solution Longopac is used. Longopac is a bag system consists of 20 meters folded hose, which gives about 25 pc dust free bag changes. ScanDust 1300 is also equipped with outlets for grinding machines with an engine capacity of up to 1200 W.

TECHNICAL DATA

Motor power: 1260 W
 Suction capacity: 210 m³/h
 Vacuum: 22 kPa
 Finefilter: Polyester
 Hepafilter: H13
 Jetpuls: Yes
 Measure: 68x38x120 cm / 27"x 15"x 47"
 Weight: 27 kg / 59 lbs.

**770000 SCANDUST 6000 /
780013 SCANDUST 6000 SEPARATOR**

ScanDust 6000 is a very powerful industrial vacuum cleaner with high performance designed for our larger grinders, SC 650 up to SC 1000 RC.

ScanDust 6000 is equipped with a main filter package that takes care of the larger particles, in traditional cartridge filters made of polyester. In addition to coarse filter package, there are also four micro-filters of type H-13 (Hepa-rated) that takes care of the small health hazardous particles.

The SD 6000 is equipped with the efficient Jet-Pulse system that pulses the filters in order to keep them clean. The SD 6000 use the Longopac bagging system, which makes managing dust very easy and efficient. With the Longopac system you will get 20m of folded plastic bag that gives you about 25 dust free changes.

For optimal result, you can use the ScanDust 6000 together with the ScanDust Separator 6000 (SD Separator 6000).The SD Separator 6000 separates up to 90% of the dust particles. This means that the filters of the Scan Dust 6000 don't need to be cleaned as often as when the SD Separator 6000 isn't in use and the filters also last longer. Additionally, the airflow is high for a longer time. The SD Separator 6000 is delivered with a hose, 3 m (9ft), for connection to the dust collector.

ScanDust Pre-separator 6000 is a great addition to ScanDust 6000 to achieve an optimal result. ScanDust Separator 6000 separates up to 90% of the dust particles. This means that the filters in ScanDust 6000 does not need to be cleaned as often and even gets a longer life. Additionally, air flow is kept higher for a long time. ScanDust pre-separator 6000 is supplied with a 3 m long hose for connecting to industrial vacuum cleaner.

TECHNICAL DATA

Motor power: 5,5 kW
 Voltage: 3 x 400 V/ 3 x 230 V
 Current: 16 Amp.
 Frequency: 50 Hz/ 60Hz
 Max airflow: 530 m³/h
 Max vacuum: 300 mbar
 Floor nozzle: 450 mm / 18"
 Sound level: 70 dB(A)
 Hepafilter: H13
 Filter cleansing: semi-automatic
 Measure: 114x72x177,5 cm / 45"x28"x70"
 Weight: 180 kg / 397 lbs.

100500 CONCRETE TEST KIT

Make your tool selection easier with Mohs hardness test. Soft diamonds on soft concrete is not a good combination. No hard diamonds on hard concrete. The concrete test kit helps you determine the hardness of the concrete and makes your choice of tools easier. With the right tools you increase the productivity and tool life.

592013 TIGER SILVER

Tiger Silver is an aggressive tool used for stripping away coatings up to 4 mm. One can usefully combine Tiger Gold with other grinding tools, such as SCXXX black or blue if you want to relieve the pressure on the surface and / or get a grind effect while you strip away the coating. This tool is best suited to our smaller machines, SC330 up to 500.

9 pcs / set

592370 RAZORBACK SILVER

Razorback Silver is a very useful tool for removing thin coatings up to 3 mm. Works great for removing paint, flake flooring, adhesive residue, carpet remnants, etc. Razorback Silver removes coating while grinding the surface.

9 pcs / set

521100 BUSH HAMMER

If you want to create a really rough surface with your grinding machine (SC 650 and up to SC 1000 RC), you can use Bush Hammer. The result can be compared to the surface after using a milling machine (scarifier) or a blasting machine.

9 pcs / set

592086 TWIN TIGER

Twin Tiger is a very aggressive tool used for tearing off thick coatings from hard surfaces. With the tool Twin Tiger you can tear away coatings up to 7 mm when using the larger floor grinding models such as SC 650 and up to our SC 1000 RC.

9 pcs / set

592080 TIGER GOLD

Tiger Gold is an aggressive tool used for stripping away coatings up to 7 mm. One can usefully combine Tiger Gold with other grinding tools, such as SCXXX black or blue if you want to relieve the pressure on the surface and / or get a grind effect while you strip away the coating. This tool is best suited for our large machines, SC 650 up to SC 1000 RC.

9 pcs / set

592081 TIGER GOLD MK

Tiger Gold WH is an aggressive tool used to strip away coatings up to 7 mm. One can combine Tiger Gold WH with other grinding tools, such as SCXXX black or blue if you want to relieve the pressure on the surface and / or get a grinding effect while you strip away the coating. This tool is best suited to our large machines, SC 650 up to SC 1000 RC.

9 pcs / set

592043 PIRANAH

Piranah is a very useful tool when removing thin coatings from concrete surfaces, up to 3 mm. It works very well in the removal of paint, flake flooring, glue residue and carpet remnants, etc. Piranah removes the coating with the least possible impact on the surface beneath the coating. Note that porous and "soft" concrete can wear on the tool.

9 pcs / set

592078 BAUTA CRUSH

BAUTA Crush is a diamond tool with large PCD Chips. The tool is very effective and aggressive in the removal of floor coverings, as well as when milling concrete.

9 pcs / set

BAUTA DOUBLE

Bauta Double is our premium series of diamond tools that give you more diamond for your money. It's efficient and high quality grinding tools in a wide range of grit sizes and hardness's to suit your needs.

BAUTA DOUBLE BLACK S

This is a tool with rough diamonds for coarse grinding of the surface. It is very appropriate tool to use before one should coat the surface with putty, thermoset coatings or tile etc.

| | | |
|---------------|---|-------------|
| 592513 | S | 9 pcs / set |
| 592514 | M | 9 pcs / set |
| 592515 | L | 9 pcs / set |
| 592516 | X | 9 pcs / set |

BAUTA DOUBLE SILVER

This is a tool with very rough diamonds to coarse grind / tearing a surface to be grind clean of casting skin or coating.

| | | |
|---------------|---|-------------|
| 592503 | S | 9 pcs / set |
| 592504 | M | 9 pcs / set |
| 592505 | L | 9 pcs / set |

ROUNDON

With RoundOn, you grind efficient at low cost. RoundOn has a longer life and is more effective than cheaper alternatives. The 3-segment design means more grinding surface for faster grinding and the round shape minimizes damage to tools and machine.

Other benefits include:

- Convenient color-coding to easily distinguish between the grit sizes of the grinding tools.
- Superior bond for maximum productivity
- Installed quickly and easily in our grinding systems.
- Fully compatible with all ScanCombiflex machines.

ROUNDON BLACK S

This is a tool with rough diamonds for coarse grinding of the surface. The tool is very good to use before coating the surface with putty, thermoset coatings or tiles.

| | | |
|---------------|----|-------------|
| 592300 | S | 9 pcs / set |
| 592301 | M | 9 pcs / set |

SCANPAD DANCERS

SCANPAD DANCERS

ScanPad Dancer is our efficient and easy to use diamond impregnated pads for polishing and maintenance of shiny floors. You can easily maintain different types of flooring such as industrial flooring, terrazzo, natural stone and vinyl flooring. ScanPad Dancers can be used at the end of our polishing system Scan Combifloor for shiny concrete floors.

ScanPad Dancer is available in four different grits: Red No. 1, No. 2 Blue, Yellow No. 3, No. 4 Green.

WOD - WET OR DRY

WOD - WET OR DRY

What is our unique system, which makes it possible to grind and polish new and old natural stone floors, both with and without water. It is a simple and fast grinding and polishing system that gives high gloss natural stone floors.

WOD discs are attached to the ScanCombiflex machine using a special Velcro cushion. The WOD system is simple and results in an excellent polishing of all types of natural stone floors.

594009 SC-SHINE™

SC-Shine™ provides a high gloss, protective finish, makes the floor resistant to stains and reduces maintenance of the surface without the costs and preparation as other coatings. It also provides a dust-protected area. It is a cosmetic finish that can replace wax and acrylic sealant. SC-Shine™ gives a similar look like a wax finish, but requires very little maintenance in comparison with a wax finish.

Use of SC-Shine™:

1. Grind according to instructions.
2. Clean the surface thoroughly.
3. Work the SC-Shine™ in a thin layer of the floor surface with a microfiber cloth. The appropriate amount is about 0.02 liters per sq.m.
4. Wait until the SC-Shine™ has been absorbed and the surface is completely dry. Usually the drying time is about 20 minutes up to an hour, depending on temperature and humidity.

5 litres / can

594010 SC-PROOF™

SC-Proof™ is intended for use in both new and old concrete for impregnation and hardening of the surface. The product is also used to reduce dust on industrial floors, parking spaces and storage areas.

SC-Proof™ is a user-friendly product that increases the durability of the concrete surface. You get a concrete surface that is easy to maintain and is resistant to abrasion, acid attacks, spills of oil and grease, while minimizing marks from black rubber wheels. SC-Proof™ is an environmentally friendly product that does not emit emissions and is not flammable.

Use of SC-Proof™:

1. Grind according to instructions.
2. Clean the surface, as it is free from dirt, dust, water, paint and oil. The temperature of the surface should be above + 5 ° C.
3. Apply a covering film of about 0.1-0.2 liters / layer / sq m, with a low-pressure spray, or pour out the SC-Proof™ liberally and spread evenly with a soft brush.
4. Allow hardening for a few hours.
5. When the surface is completely dry, repeat the application of SC-Proof™.
6. Walk able surface is within about 2-4 hours. Wait about two days before the standing water is permitted.

10 litres / can

STEELGRINDING

Grinding of steel decks on ships has taken a big step forward with the new development of diamond tools and custom machines. Grinding away rust, paint, metal and contaminants can now be performed on large surfaces quickly and very cost effective.

560002-ST SCANCOMBIFLEX 650 STEEL

ScanCombiflex 650 is a robust and stable machine made of steel, in addition to the intended use of both residential and commercial projects, the machine is ideal for grinding steel surfaces like ship decks, dry docks, steel ramps or other surfaces of steel.

With the right choice of diamond tools you can remove rust, paint and other impurities in an efficient and economical way.

SC 650 is extremely durable and easy to maintain. It is also designed to reduce vibrations and stress injuries to the operator.

SC 650 has integrated connection for water hose. Water can be used to reduce dust during grinding of rusty ship deck where the vacuum cleaner is not enough.

581000-ST SCANCOMBIFLEX 800 STEEL

The ScanCombiflex 800 (SC 800) is a robust and stable machine made of steel, designed for high productivity of booth concrete surfaces and steel decks on ships..

The 800 mm wide and 380 kg (838 lbs.) heavy machine is ideal for grinding away rust and old paint and coarse anti-slip coatings, the type Bimagrip. SC 800 can also be equipped with special tools for grinding down of an old system of anti-slip example ferries that are made of welded steel balls with approx. 8 mm height. Big Bauta diamond tools "rides" on steel balls that effectively sanded down to bare steel.

The SC 800 has three grinding heads, which spin in a counter-rotating configuration for increased efficiency and smooth operation. This allows the machine to grind or polish at higher speeds, while at the same time minimizing side torque and stress on the operator. The stable balance in the machine also reduces vibrations for the operator, and enables the machine to produce consistent results with minimal effort.

GRINDING GUIDE

REMOVAL WORK OF OLD COATINGS UP TO 7 MM (0,28 IN)

To this we recommend that our larger grinding machines be used. ScanCombiflex 650 up to ScanCombiflex 1000 RC.

Step 1. Use the tool Twin Tiger alternatively Tiger Gold.

Step 2. To remove scratches after the Tiger tool we recommend you use the tool Bauta Double Black.

592086 Twin Tiger

592080 Tiger Gold

592513 Bauta Double Black S

REMOVAL WORK OF OLD COATINGS UP TO 4 MM (0,16IN)

For this, we recommend that you use one of our smaller grinding machines, from SC 330 up to SC 500 PD.

Step 1: Use the tool Tiger Silver alternatively Piranha.

Step 2. To remove scratches after Tiger tool, we recommend that you use the tool Bauta Double Black.

592013 Tiger Silver

592043 Piranha

592513 Bauta Double Black S

FLOOR PREPARATION BEFORE APPLYING NEW COATING

Here we recommend that you use the tool Bauta Double Blue, if you have really hard concrete, we recommend Round Rap Blue.

592533 Bauta Double Blue S

592210 Round Rap Blue

FLOOR PREPARATION BEFORE NEW COATING THICKER THAN 0,5 MM (0,02IN)

Here we recommend that you use the tool Bauta Double Black, for really hard concrete use Round Rap Black.

If you want to create a really rough surface with your grinding machine (SC 650 - SC 1000 RC), you can use the Bush Hammer tool. The result can be compared to the surface after using a milling machine (scaryfier) or a blasting machine.

SCAN COMBIFLOOR

Scan Combifloor is a complete concept for polishing concrete. You grind the concrete with reliable and well-tested method specially developed for Scanmaskin high quality products. The result is a floor that is of very high quality, both functionally and visually.

VERSION STANDARD 4 STEPS

Version Standard is the first grind and polishing system in the Scan Combifloor concept.

Step 1. Grind the concrete surface with Bauta Double Green until you have removed the top layer of concrete and produced as much visible stone you want and can. Vacuum then the surface thoroughly.

Impregnate the concrete surface with SC-Proof™, as follows:

A: Clean the surface. The temperature of the surface should be above + 5 ° C.

B: Apply a sealing film, about 0.1-0.2 liters per square meter with a low-pressure sprayer.

C: Let harden for a few hours.

D: When the surface is completely dry, repeat step B

E: Wait approximately 2-4 hours before going on to the next grinding step.

Step 2. Use Bauta Double White and grind thoroughly to remove scratches. Vacuum then the surface thoroughly.

Step 3. To remove scratches from step 2, grind thoroughly with the RDC Black. Vacuum then the surface thoroughly.

Step 4. To remove scratches from step 3, grind with the RDC Blue. Vacuum then the surface thoroughly.

Impregnate the concrete surface with SC Shine™ as follows:

A: Clean the surface.

B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.

C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.

Put on ScanPad Dancer No. 3 Yellow on your clean grinder or a high-speed machine and polish the surface.

Impregnate the concrete surface again with SC-Shine™ as follows:

A: Clean the surface.

B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.

C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.

Put on ScanPad Dancer No. 4 Green on your clean grinder or a high-speed machine and polish the surface.

The floor is now ready for use.

If you during the first 7 days keep the floor dry and after that use ScanPad Dancer No. 4 Green with your disc machine the floor will stay shiny and new. You add water only when you use ScanPad Dancer for maintenance of the floor. No cleaning liquid is needed.

VERSION MEDIUM 5 STEPS

Version Medium is the middle grinding and polishing system in the Scan Combifloor concept. Select Version Medium when you want a little more durable flooring with a higher gloss.

Step 1. Sand the concrete surface with Bauta Double Green until you have removed the top layer of concrete and produced as much visible stone you want and can. Vacuum then the surface thoroughly.

Impregnate the concrete surface with SC-Proof™, as follows:
 A: Clean the surface. The temperature of the surface should be above + 5 ° C.
 B: Apply a sealing film, about 0.1-0.2 liters per square meter with a low-pressure sprayer.
 C: Let harden for a few hours.
 D: When the surface is completely dry, repeat steps B
 E: Wait approximately 2-4 hours before going on to the next grinding step.

Step 2. Use Bauta Double White and grind thoroughly to remove scratches. Vacuum then the surface thoroughly.

Step 3. To remove scratches from step 2, grind thoroughly with the RDC Black. Vacuum then the surface thoroughly.

Step 4. To remove scratches from step 3, grind thoroughly with the RDC Blue. Vacuum then the surface thoroughly.

Step 5. Grind the concrete surface thoroughly with the RDC Red. Vacuum then the surface thoroughly.
 Impregnate the concrete surface with SC Shine™ as follows:
 A: Clean the surface.
 B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.
 C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.

Put on ScanPad Dancer No. 3 Yellow on your clean grinder or a high-speed machine and polish the surface.
 Impregnate the concrete surface again with SC-Shine™ as follows:
 A: Clean the surface.
 B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.
 C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.
 Put on ScanPad Dancer No. 4 Green on your clean grinder or a high-speed machine and polish the surface.

The floor is now ready for use.
 If you during the first 7 days keep the floor dry and after that use ScanPad Dancer No. 4 Green with your disc machine the floor will stay shiny and new. You add water only when you use ScanPad Dancer for maintenance of the floor. No cleaning liquid is needed.

VERSION EXKLUSIV 7 STEPS

Version Exclusive is the third grinding and polishing system in the Scan Combifloor concept. Version Exclusive is select when you want a really tough floor of high resistance, for example, tire marks and dirt while keeping a very nice shine.

Step 1. Sand the concrete surface with Bauta Double Green until you have removed the top layer of concrete and produced as much visible stone you want and can. Vacuum then the surface thoroughly.

Impregnate the concrete surface with SC-Proof™, as follows:
 A: Clean the surface. The temperature of the surface should be above + 5 ° C.
 B: Apply a sealing film, about 0.1-0.2 liters per square meter with a low-pressure sprayer.
 C: Let harden for a few hours.
 D: When the surface is completely dry, repeat steps B
 E: Wait approximately 2-4 hours before going on to the next grinding step.

Step 2. Use Bauta Double White and grind thoroughly to remove scratches. Vacuum then the surface thoroughly.

Step 3. To remove scratches from step 2, grind thoroughly with the RDC Black. Vacuum then the surface thoroughly.

Step 4. To remove scratches from step 3, grind thoroughly with the RDC Blue. Vacuum then the surface thoroughly.

Step 5. Grind the concrete surface thoroughly with the RDC Red. Vacuum then the surface thoroughly.

Step 6. Grind the concrete surface thoroughly with the RDC White. Vacuum then the surface thoroughly.

Step 7. Grind the concrete surface thoroughly with the RDC Green. Vacuum then the surface thoroughly.

Impregnate the concrete surface with SC Shine™ as follows:
 A: Clean the surface.
 B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.
 C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.

Put on ScanPad Dancer No. 3 Yellow on your clean grinder or a high-speed machine and polish the surface.

Impregnate the concrete surface again with SC-Shine™ as follows:
 A: Clean the surface.
 B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.
 C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.

Put on ScanPad Dancer No. 4 Green on your clean grinder or a high-speed machine and polish the surface.

The floor is now ready for use.
 If you during the first 7 days keep the floor dry and after that use ScanPad Dancer No. 4 Green with your disc machine the floor will stay shiny and new. You add water only when you use ScanPad Dancer for maintenance of the floor. No cleaning liquid is needed.

VERSION MATTE 2 STEPS

The matte version of the Scan Combifloor does not give an equally polished surface as the other versions, but is likely to decrease dust collections.

Step 1. Sand the concrete surface with Bauta Double Green until you have removed the top layer of concrete and produced as much visible stone you want and can. Vacuum then the surface thoroughly.

Impregnate the concrete surface with SC-Proof™, as follows:

- A: Clean the surface. The temperature of the surface should be above + 5 ° C.
- B: Apply a sealing film, about 0.1-0.2 liters per square meter with a low-pressure sprayer.
- C: Let harden for a few hours.
- D: When the surface is completely dry, repeat steps B
- E: Wait approximately 2-4 hours before going on to the next grinding step.

Step 2. Use Bauta Double White and grind thoroughly to remove scratches. Vacuum then the surface thoroughly.

- A: Clean the surface.
- B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.
- C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.

Put on ScanPad Dancer No. 3 Yellow on your clean grinder or a high-speed machine and polish the surface.

Impregnate the concrete surface again with SC-Shine™ as follows:

- A: Clean the surface.
- B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.
- C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.

Put on ScanPad Dancer No. 4 Green on your clean grinder or a high-speed machine and polish the surface.

The floor is now ready for use.

If you during the first 7 days keep the floor dry and after that use ScanPad Dancer No. 4 Green with your disc machine the floor will stay shiny and new. You add water only when you use ScanPad Dancer for maintenance of the floor. No cleaning liquid is needed.

GRINDING OF GRANIT, MARBLE AND SANDSTONE

Step 1. If you need to start with grinding down the surface to remove deep scratches in the stone, you start to grind with Bauta Double White. This is a medium hard tool with very fine diamonds. It works fine to both dry and wet grind with this tool. When grinding granite, we recommend using water, or at least moisten the surface.

Step 2. After Step 1, we recommend you to grind with Bauta Double Yellow. This will eliminate the risk of any grind roses after Bauta Double White. It works fine to grind both wet and dry with Bauta Double Yellow. Always use water when grinding granite.

Step 3/ Step 1. Continue with WOD Grey. If grinding is not necessary, you start right away with the WOD Grey, which then becomes your first step. WOD Grey is a unique tool that makes both wet and dry polishing possible. When you polish granite, we recommend to always using water, or at least moistens the surface.

Step 4./ Step 2. Continue with WOD Black.

Step 5./ Step 3. Continue with WOD Blue.

Step 6./ Step 4. Continue with WOD Red.

Step 7./ Step 5. Continue with WOD White.

Step 8. / Step 6. Continue with WOD Yellow.

Step 9./ Step 7. Continue with WOD Green.

Impregnate the concrete surface with SC Shine as follows:

- A: Clean the surface.
- B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.
- C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.

Put on ScanPad Dancer No. 3 Yellow on your clean grinder or a high-speed machine and polish the surface.

Impregnate the concrete surface again with SC-Shine™ as follows:

- A: Clean the surface.
- B: Working in SC-Shine™ on the floor surface in a thin layer with a micro-fiber cloth, about 0.02 liters per square meter.
- C: Wait until the surface is completely dry before proceeding to the next step. The absorption time is about 20 minutes depending on temperature and humidity.

Put on ScanPad Dancer No. 4 Green on your clean grinder or a high-speed machine and polish the surface.

The floor is now ready for use.

GRINDING OF BRIDGES, GARAGES AND PARKING AREAS

For grinding bridges, garages and parking decks we recommend one of our larger grinders, as ScanCombiflex 650 up to ScanCombiflex 1000 RC. For the best and fastest results, we recommend one of our machines with radio control.

Step 1. Remove the old layer and grind out a clean concrete surface with Twin Tiger, Tiger Gold or Piranha.

Step 2. If you need to remove coarse scratches after using the Tiger tool, you can do it with the help of Bauta Double Black.

592086 Twin Tiger

592080 Tiger Gold

592043 Piranha

592513 Bauta Double Black S

GRINDING OF WOODEN BRIDGES

Step 1. Remove the old surface layer and work up a clean wood surface with the tool Scratch with claw.

Step 2. If you need to remove coarse scratches for the use of Scratch with claw you can do it with the help of Scratch Rough or Medium.

GRINDING OF HARDWOOD FLOORS

For sanding wood and parquet flooring, we recommend Scanmaskin 18

Sanding wood floors.

Follow these steps to get optimal results; do not forget to vacuum the floor thoroughly between the different steps:

Step 1. If you need to remove the old flooring you should use the Scratch with claw.

Step 2. For rough sanding, smoothing and old wooden floors we recommend the tool scratch Rough. You do this even if you have to remove paint or varnish. The result is an even, clean floor.

Step 3. If you followed the previous steps, we recommend you to use the tool Scratch Medium before proceeding to the next step.

Step 4. / Step 1. If you already have a flat floor without any coating, this is your first step. Put on the Velcro holders and middle cushion, and then attach the sandpaper. Begin with sandpaper # 24 or # 40, it is always best to start with a fine sandpaper to optimize the grinding process.

Step 5. / Step 2. Continue and sand with sandpaper # 60

Step 6. / Step 3. Continue with sandpaper # 100

Step 7. / Step 4. Continue with sandpaper # 120

SANDPAPER

Our sandpapers are available in these grits: #16, #24, #36, #40, #60, #80, #100, #120.

GRINDING OF PARQUET FLOORING

Step 1. If you need to remove any type of varnish from the parquet floor, you can do it quickly and easily with the tools Scratch Medium or Fine.

If you have a laminate floor, you should instead only use sandpaper.

Step 2 / Step 1. Once you have removed any deposits continue with sandpaper. If you have a floor without coating, this will be your first step. Remember to vacuum thoroughly between sanding steps.

Put on the Velcro holders and middle cushion before mounting the sandpaper. We recommend that you start with sandpaper # 24 or # 40. It is always best to start with a fine sandpaper to save on the steps of the grinding process.

Step 3 / Step 2. Continue with sandpaper # 60

Step 4./ Step 3. Continue with sandpaper # 100

Step 5./ Step 4. Continue with sandpaper # 120

The floor surface is now ready for impregnation with oil or varnish.

SANDPAPER

Our sandpapers are available in these grits: #16, #24, #36, #40, #60, #80, #100, #120.

**210000 BATTERY POWER TROWEL**

Battery driven Trowel machine for epoxy-based coatings for floors with colored granules, and floor coverings of natural stone.

Included: Machine, handlebar, 1 trowel disc with a diameter of 500 mm, 20 trowelling blades (mounted), key for removing the trowel disc, 3 battery belts and 2 battery chargers.

TECHNICAL DATA

Motor power: 0,2 kW
 Voltage battery: 24 V
 Voltage battery charger: 1 x 230 W / 1 x 110 V
 Speed: 0-170/rpm
 Work width: 475 mm / 19"
 Weight: 14 kg / 31 lbs.
 Measure: 50x100x50 cm / 19,7" x 40" x 19,7"

**220000 ELECTRIC POWER TROWEL MACHINE**

Electric power float for epoxy-based coatings for floors with colored granules, and floor coverings made of natural stone.

Included: Machine, handlebar, 1 trowel disc with a diameter of 500 mm, 20 trowelling blades (mounted) and key for removing the trowel disc.

TECHNICAL DATA

Motor power: 0,2 kW
 Voltage: 1 x 230 W / 1 x 110 V
